

Mangal / Mangalik Dosha

Generally , there is a misconception / fear among people reg. this dosha . You will find such combination in 50% of the cases i.e. one out of every second person. As per rules ; if Mars (mangal) is placed in any of the 6 nos houses namely 1/2/4/7/8/12 out of total 12 nos houses makes the native Mangalik. Out of this 6 nos positions ; placement of Mars in 7H & 8H considered to be more cautious . Some of the learned astrologer community considered only 5 nos houses *excluding 2H* for declaring native to be “**Mangalik**” .It is generally advisable/ recommended that a person having such combinations must marry with only those who are having similar kind of combination in their respective charts. It may also please be noted that there is nothing to fear about such combinations because it has also got multiple benefits attached to it. For instance Mars also represents courage; aggressiveness; energy; confidence; dynamism; quick decision making capability; straight forwardness; charming; lovable; stamina; athletic body etc. that are essentially required by any individual to be successful both in his/her personal (*especially marriage*) & professional life. On De-merits side it makes the person short tempered; harsh; emotionless.

Illustration:-

In the above example; Mars is posited in 7H and that too in its **exaltation sign**, thereby, making the native Mangalik. In this particular case; if u considers the “Navamsa” chart there also Mars in posited in 7H (*though in its debilitation sign*) attesting that the native is pure Mangalik from every perspective.
